Remote Control Operation Instructions

A. Coding of Remote Control and Control Box

STEP1: When the mount is powered on, press the small button on the control box with a thin tool as shown. The unit will emit a beep, indicating that the control box is on standby for program coding.

STEP2: Press the "⏻" button on the remote control, and you will hear repeated beeps for approximate 10 seconds indicating that the remote control is being programmed. The unit will emit a beep again indicating success.

Note: Clear up the historical data when replacing a new remote control to pair. Press the small button on the control box with hearing a beep, and hold for 5 seconds to confirm the data-cleaning process is completed until you hear a beep again.

Note: The remote control is powered by two AAA batteries (not included).

B. Button Functions

1. Upward/Downward Movement

Press and hold the "△" button to lift the mount. Press and hold the "▽" button to lower the mount. (Tips: Clear up all obstacles within the range of motion.)

2. Memory Setting

Long press the "mem1" or "mem2" button for 3 seconds until you hear a beep, indicating that the current position has been saved to memory. The "mem1" "mem2" buttons can each store a different position.

3. Recall Memory

Press the "1" or "2" button and the mount will automatically get to the position saved in the corresponding button "mem1" or "mem2".

4. Lowest Height Limit Setting

Short press the "mem1" button five times, after each press you will hear a beep and at the fifth press two beeps. This indicates the current height is now saved as the lowest height setting. The lowest height limit will be erased should the remote control be reset.

5. Default Setting

Short press the "OK" button and the mount will automatically retract to the lowest position. To stop it, press the "OK" button again.

6. Reset Mode

Long press the "OK" button for 3 seconds until you hear a beep, and the mount starts to move downwards. Then the mount will move upwards a little bit when reaching the lowest position and automatically come to a stop. The system resets successfully when the unit emits two beeps.

7. Connect the Mount to a New Device

Short press the "mem2" button five times, after each press you will hear a beep and at the fifth press two beeps, which indicates the mount is disconnecting from the current paired device. The disconnection is successful when the unit emits one beep. Then follow the *Guidebook of Tuya App Installation and Operation* to connect the mount to a new device.

Note: If the device is failed to search the mount when connecting, follow the above steps or restart the device to re-search the mount.
