Highlights

24/7 operation

With 500 cd/m2 brightness, and a higher haze factor to reduce reflection, the Philips Signage 4150 is designed to be used 24/7, making it a great selection for retail settings, quick service restaurants, public venues, and more.

Powered by Android 16

Powered by Android 16, your Philips Signage 4100 Series display is designed on a professional platform with trusted connectivity and security built in. Optimised for native Android apps and enabling you to install web apps and software directly onto the display, eliminating the need for an external media player.

AI ready with 3 TOPS NPU

With 3 TOPS processing power built in, ready to run your AI applications on the display, ensuring your business is future proof to deliver the high performance content you need into the long term.

Philips Wave ready

Unlock the power, versatility and intelligence inside your Philips Signage 4100 Series displays remotely with Wave. This evolutionary cloud platform puts you fully in control, with simplified installation and set-up, monitoring and controlling displays, upgrading firmware, managing playlists and setting power schedules. Saving you time, energy, and environmental impact.

FailOver

Critical for demanding commercial applications, FailOver is a revolutionary technology that automatically plays back up content on screen in the unlikely event of a media player failure. Simply select a primary input connection and a FailOver connection and you are ready for instant content protection.

Modularity built in

Extend your display further into the future with our modular approach. Bringing opportunities to add WiFi and Bluetooth with the optional CRD32 module, as well as Philips ScreenShare for easy wireless content sharing. Plus, a firm focus on reuse and recyclability, as well as sustainability, with extended lifetime possibilities enabling reduced WEEE disposal.
